Room darkening awnings

Stay cool in the shade

eürofürst

*All the diversity, all the excitement
And all the beauty of life
Is made up of sunshine and shade.*

Leo Tolstoy

STOBAG - Premium Swiss Quality *Stay cool in the shade*

Shade means quality of life.

Your increasing demand for convenience, functionality and design has motivated us time and again to develop innovative solutions - and this since 1964.

Whether for balconies or terraces, conservatories or facades - as the leading Swiss manufacturer, STOBAG offers a wide range of individual awning systems to suit all requirements.

Your shade oasis can be comfortably expanded and automated through cleverly devised comfort options.

Plunge into the inspired world of colours and forms. Experience the fantastic symbiosis of quality, technology and design.

Quality and safety

We guarantee you durable products in uncompromising quality. We achieve this through the consistent use of high quality materials, modern and environmentally sustainable production processes as well as continuous safety inspections.

Functionality & Technology

Our many years of experience and close cooperation with specialists, architects and planners enable us to develop innovative products that meet the highest demands.- yesterday, today and tomorrow.

Aesthetics & design

Emotions turn our daily routine into an adventure. The influence of colours and forms play a central role in this. Therefore STOBAG awnings are customised for you. Select from over 350 cover designs and countless frame colours and you can achieve the perfect harmony between architecture and environment

VENTOSOL-LUNERO

Turns day into night

The state-of-the-art VENTOSOL-LUNERO room darkening system ensures the reliable exclusion of light. The SIR-System™ (Soft Integrated Retaining System), which works like a zip, guarantees optimum guidance of the opaque fabric. The use of a special end profile ensures outstanding light exclusion in training and conference rooms even in bright daylight. The elegant aluminium box is self-supporting and easy to install - even with retrofitting. The VENTOSOL-LUNERO VD5400 has been specially designed for horizontal use, for example in dormers. With this version, the integral gas cylinder and the standard electric drive, which can also be operated remotely, ensure permanent fabric tensioning.

*The optimum solution for excluding light in conference rooms,
training and private suites.*

Awning accessories and options

Colours

Powdercoating elements are implemented more often with façade design in current architecture.

As the leading awning manufacturer we have been using this environment friendly and high quality finishing technology, which provides durable protection, for years. Whether RAL, NCS or various special colours from our TOP TEN palette, the colour selection is almost limitless.

Automation

We offer you exactly the comfort that you want from your individual awning system, from simple wind sensors to complex centralised air-conditioning. Regardless of whether you extend an awning via remote control, turn on atmospheric lighting or you want to control the façade and conservatory awning system in groups: our reliable automatic systems master any situation.

Material

Play of colours and UV protection..

The colour selection of an awning cover influences the play of light and shade in the same manner as the perception of the environment. All awning covers are tested according to strict norms. They provide a high UV protection factor and filter at least 90% of UV rays. - Let our cover collection inspire you.
